About Us

— Greetings

In 2012 we started as a group of professionals specializing in real estate revitalization. This was made possible with our knowhow on how to value up real estate, gained through our experience of real estate development and management. At this time, the world was facing a financial crisis originating from the subprime mortgage problem and the European debt crisis. These incidents casted a shadow on the financial markets across the world. In Japan we experienced many difficulties such as the Great East Japan Earthquake, accounting fraud at a major corporation, and whistle-blowing of companies with poor working conditions. These problems caused major social and economical damage and the real estate market was also greatly affected. Even during these difficult times, we always keep at heart a saying from a "Tanka"(Japanese short poem), which says that it is not power but your heart that is important when accomplishing something. This was a poem written to Shinpei Goto, a minister responsible for the reconstruction of Tokyo after the Great Kanto Earthquake. Like "Titan", a family of giants from Greek mythology, our best project team works hard to achieve the best results.

Since the foundation of our company 10 years ago, times have become more cataclysmic. During the transition from the Heisei era to the Reiwa era, the COVID-19 pandemic has changed our values, but we believe that it is always sincerity that motivates people. Rather than focusing on the challenges we face, we focus on how to act when faced with a difficult situation. We never give up, we never walk away from challenges and will always be modest and unpretentious when doing business.

December 2021 Taitan Capital, Inc.
